TQFPCS V2.0 Food Sector Categories

The scope of TQF product certification covers the specifications established with food safety fundamentals (Chapter 4), food safety management(Chapter 5), and food quality management (Chapter 6) which is based on the requirements for the manufacturing, processing, and logistic processes of foods for human consumption (including food ingredients and food additives).

Based on product properties, the TQF Scheme has covered the manufacturing of 4 types of processed food: the processing of perishable animal products, the processing of perishable plant products, the processing of perishable animal and plant products (mixed products), and the processing of products stable at room temperature, that totaling 28 categories of products (as food safety fundamentals specified in Chapter 4). Specific provisions are established for each category product as the technical specifications and the classification is shown below:

The manufacturing of 4 types of processed food are tabulated below:

Group	Types	Examples of products included
Food Manufacturing	EI Processing of perishable animal products	Production of animal products, including beverages, dairy products, processed seafood, processed meat products, frozen foods, chilled prepared foods, and functional foods.
	EII Processing of perishable vegetal products	Production of vegetal products, including beverages, baked foods, noodles, preserved fruits and vegetables, processed soybean products, frozen foods, chilled prepared foods, and functional foods.
	EIII Processing of perishable animal and vegetal products (mixed products)	Production of mixed animal and vegetal foods, including beverages, baked foods, dairy products, ice & novelties, noodles, ready to eat meals, frozen foods, spices & condiments, chilled prepared foods, and functional foods.
	EIV Processing of ambient stable products	Production of any foods stored and sold at ambient temperature, including beverages, baking foods, edible oils, dairy products, powdered infant formula, soy sauces, noodles, confectionary, MSG, preserved fruits and vegetables, soybean processed foods, processed seafood, canned foods, spices & condiments, processed meat products, dehydrated foods, tea leaf, flour, refined sugar, starch sugar, alcohol & liquor, functional foods, food additives, and foods in general.

The 28 categories of products (categories No. 1-27 and No. 99) are tabulated below:

<input type="checkbox"/> 99. Foods in General	<input type="checkbox"/> 06. Soy sauce	<input type="checkbox"/> 12. Preserved fruits and vegetables	<input type="checkbox"/> 18. Processed meat products	<input type="checkbox"/> 24. Starch sugar
<input type="checkbox"/> 01. Beverages	<input type="checkbox"/> 07. Ice & novelties	<input type="checkbox"/> 13. Processed soybean products	<input type="checkbox"/> 19. Chilled prepared foods	<input type="checkbox"/> 25. Alcohol & liquor
<input type="checkbox"/> 02. Baked foods	<input type="checkbox"/> 08. Noodles	<input type="checkbox"/> 14. Processed seafood	<input type="checkbox"/> 20. Dehydrated foods	<input type="checkbox"/> 26. Functional food
<input type="checkbox"/> 03. Edible oils	<input type="checkbox"/> 09. Confectionary	<input type="checkbox"/> 15. Frozen foods	<input type="checkbox"/> 21. Tea leaf	<input type="checkbox"/> 27. Food additives
<input type="checkbox"/> 04. Dairy products	<input type="checkbox"/> 10. Ready to eat meals	<input type="checkbox"/> 16. Canned foods	<input type="checkbox"/> 22. Flour	
<input type="checkbox"/> 05. Powdered infant formula	<input type="checkbox"/> 11. MSG	<input type="checkbox"/> 17. Spices & condiments	<input type="checkbox"/> 23. Refined sugar
